Silicone Thoracic Catheters

OVERVIEW

REDAX silicone thoracic catheters enhance patient outcomes and comfort while maintaining patency. The soft, flexible silicone reduces pain in early ambulation and upon removal. Complications are minimized due to the silicone's kink resistance and bio and hemocompatibility. The elliptical smooth side eyes and open distal tip minimize occlusion and encourage fluid evacuation.

DESIGNED FOR POSITIONING, PATENCY & DRAINAGE

- Elliptical & Tapered Smooth Side Eyes
- Open, Tapered Distal Tip
- Depth Marks for Safe Positioning
- Straight or Angled

SILICONE CONSTRUCTION

- Softness Reduces Pain/Discomfort for Early Mobilization and Removal
- Bio & Hemo-Compatible
- Kink-resistant
- Transparent for Drainage Visibility
